The following written questions have been received from members of the public.

(i) Traffic in Rottingdean- John Bryant

"On the 31/10/17 the RPC commissioned a queue count in the busy period of traffic travelling east from Brighton through Rottingdean. This was completed by ESCC Traffic Monitoring unit. The report showed that the average queue was 382 vehicles. This compares with estimated queue lengths contained in 3 different Planning Applications ranging from 100 as the largest queue to some 25 vehicles at the lowest.

Transport Officers when reporting on Transport Assessments submitted by Developers must be required to have cognizance of such data. Does the Chair agree?"
