Legal:

- 5.1 The statutory objective of a Local Safeguarding Children Board is
 - (a) to co-ordinate what is done by each person or body represented on the Board for the purposes of safeguarding and promoting the welfare of children in the area of the authority by which it is established; and
 - (b) to ensure the effectiveness of what is done by each such person or body for those purposes. The LSCB Business Plan provides strategies & action plans for the priority areas identified, which if implemented will assist the capacity of member agencies to

fulfil their statutory duty to cooperate to promote the wellbeing of children (Children Act 2004).

The work of the Board contributes to improved community cohesion. Throughout the year there was been much public engagement work and the Board has developed a new website and other communication methods to increase community engagement with the work of the Board.
- 5.4 Sustainability:

The LSCB is a statutory requirement and is resourced over the forthcoming year.

Health, social care, children's services and public health:

5.5 One of the key objectives of the LSCB is to improve outcomes and health and wellbeing for children and young people from diverse communities and groups, and for those who live in deprived geographical communities. Brighton & Hove Local Safeguarding Children Board Business Plan 2016 - 2019

Brighton & Hove

What children and young people in Brighton & Hove told us

Listening to children & young people and involving them in discussions about how to protect themselves from harm, is a vital aspect of safeguarding. As such we felt it was crucial to have conversations with children about the Board's priorities for the next three years. We spoke to some year six children from primary schools in Brighton & Hove, asking them to rate how important they think our priorities are on a scale of 1-5. They held very strong views and enjoyed the discussion. They told us that it was very important that children are talked to about the issues the Board have identified and listened to when they have concerns. The children said that they felt very responsible and proud that their views were valued and being listened to, and we are grateful for their feedback.

Participation & Engagement

Children agreed and said that it is important that we tell people about the work of the Board, rating it 4 out of 5. They said that it is very important that feedback from families and children is heard and responded to by agencies, and rated this 5 out of 5 Children should be involved as they have just as important views as adults, especially as it is concerning them.

Definitely they need to know there are people there to help them Mega important. People need to know what there is to support them

How else do you get better at things? You need to listen to know what the problems are and what help they need

It must be really hard not to have parents that love and care for you and so you would need help from somewhere else

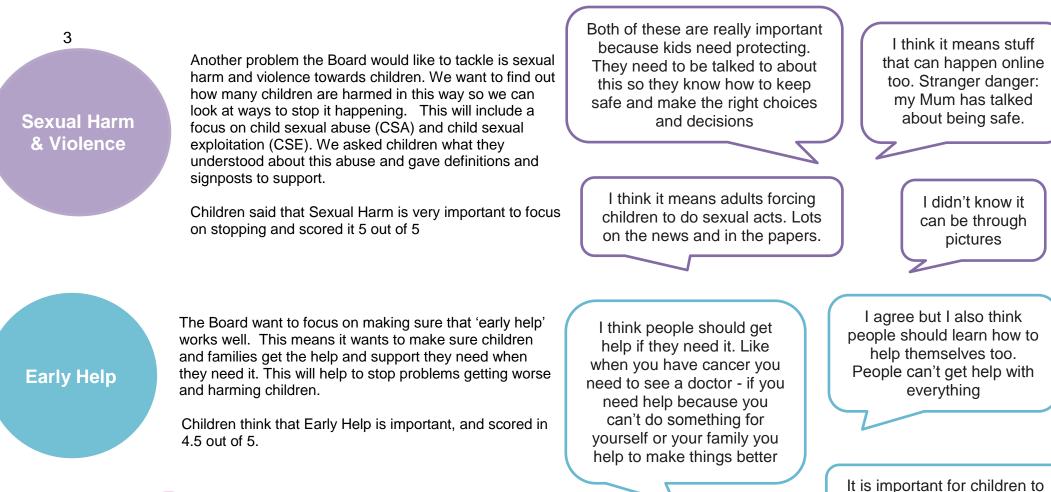

It would change someone's life for the better if they got help

If there are no groups to tackle neglect then children who are being neglected will carry on being neglected

One of the problems that the Board would like to tackle is child neglect. We have chosen Neglect because it is the most common form of child abuse and one of the top problems affecting children in Brighton & Hove. Neglect happens when parents or carers can't or won't give a child what they need, for example; clean, warm clothing, enough food, protection from dangerous situations or enough attention given to a child's health and diet. Sometimes this is because the adult does not have the skills or support they need, and sometimes it's due to other problems such as mental health issues or drug and alcohol problems.

Children rated neglect as a very important concern with a score of 4.5 out of 5

Priority Area 5: Participation & Engagement

It is important that the work of the Board is effectively communicated across our target audiences so that they feel informed about work we do to improve safeguarding in Brighton & Hove. Regulation 5 of the Local Safeguarding Children Boards Regulations 2006 provides that LSCBs are responsible for "communicating to persons and bodies in the area of the authority the need to safeguard and promote the welfare of children, raising their awareness of how this can best be done and encouraging them to do so".

Outcome: Learning from LSCB reviews is known, understood and influences the practice of staff across the partnership and learning and improvement is informed by feedback from those who access and deliver safeguarding and child protection services in Brighton & Hove.
