# Key Considerations in the Application

---

- Principle of extending the site;
- Whether design and appearance appropriate for site and wider setting, including preservation and enhancement of character of Sackville Gardens Conservation Area.
- Impact on the amenity of residents, particularly with noise disturbance.

# Conclusion and Planning Balance

- Principle of regenerating property and attractions on seafront is supported and benefits acknowledged;
- Increase in height considered detrimental and harmful to the conservation area, without benefits outweighing that harm. No sufficiently robust reason for allowing the harmful increase in height so any additional benefits of the increased height, over approved development, would not outweigh the harm.
- No significant harm to residents from noise/disturbance anticipated.
  
- **Recommendation - Refuse**
