Key Considerations in the Application

- Principle of development
- Design and heritage
- The impact on neighbouring amenity
- The proposed standard of accommodation
- The impact on the local highways network

Conclusion and Planning Balance

- This application is considered acceptable since the additional storeys would preserve the character and appearance of the conservation area and would be a subordinate, well-designed addition to the host buildings providing three new good quality dwellings. The extensions would not cause harm to neighbouring amenity or to the highways network, but would provide an acceptable standard of accommodation. As such, this application is recommended for approval.
