Key Considerations in the Application

- Principle of development
- Design
- Landscaping and biodiversity
- Impact on neighbouring amenity
- Impact on highways

Conclusion and Planning Balance

- The proposals would provide 617.2m² of employment floorspace employing nine FTE jobs, a biodiversity net gain, and it would generate some economic activity during construction work and from the spending in the local economy from the future customers; which are relatively significant benefits of the proposal. The LPA supports the well-designed building and the proposed use, which would not have a significantly adverse impact on neighbouring amenity and would be acceptable on transport grounds, subject to appropriate conditions. The proposal is therefore recommended for approval, subject to conditions.
