Key Considerations in the Application

- Design of the extension
- Impact on the surrounding conservation area
- Impact on the protected trees on site
- Impact on neighbouring amenity
- History of the site including an appeal decision in 2017

Conclusion and Planning Balance

The scheme is considered to be a significant improvement on the previous proposals and would not cause substantial harm to the character and appearance of the existing property, streetscenes or the surrounding conservation area. The proposal would be sustainable and valuable trees would be protected. The benefits of additional specialist care home provision are a positive of the scheme which balance against any limited harm to the conservation area. Residential amenity would not be compromised. The proposal would have limited impact in terms of transport.
