Key Considerations in the Application

- Reinstatement of original features to a listed building
- Urgent repair works to a listed building
- Impact on Royal Pavilion Gardens
- Impact on Grade I and Grade II listed buildings
- Impact on Valley Gardens conservation area.

Conclusion and Planning Balance

- The proposed replacement of the copper roof of the Pavilion Theatre is necessary as the existing copper roof is damaged beyond repair. It will be replaced like-for-like.
- The proposed replacement of the copper roof is necessary due to poor condition, while it has been previously patched up, this is no longer viable.
- The visual impact of the new copper roof will be negligible overall but would present initial stark contrast in terms of colour while the copper naturally patinates. It would not adversely affect views of the Grade I listed building or the wider Royal Pavilion Estate.
- Heritage comments support the justifications for the works and conclude that there will be no harm to the appearance of the conservation area or to the settings of the adjacent heritage assets, including the Pavilion Gardens.
- **The proposals are therefore recommended for approval (FP and LBC).**
