TENNIS

KINGSWAY TO THE SEA: WEST HOVE SEAFRONT PUBLIC REALM IMPROVEMENTS

TENNIS

Artist's impression, view from east showing new Tennis Courts and the new accessible route through the Linear Park

NEW TENNIS FACILITIES

- 6no new Tennis Courts are proposed for the existing western Tennis Courts area
- 4no Courts will be within one area, which is the number required by the Tennis Club when they have club events
- An additional 2no Courts will be in a separate area adjacent
- A new Tennis Pavilion building in-between will provide some facilities, including WCs
- Lighting will enable the courts to be used for longer periods through the year
- The space will become more accessible as elsewhere throughout the park with the introduction of new ramped inclines, including planting, with trees where possible, for improved shade and shelter, as well as biodiversity

Existing western Tennis Courts area, showing accessibility issues

Existing MUGA facility contributes to inaccessibility of the site

Artist's impression, view from north at Kingsway looking towards the Esplanade, showing park entrance with new amenities and ramped incline towards Tennis area

Planted embankment precedent (Botanic Gardens, Barcelona)

Planted embankment precedent (Queen Elizabeth Olympic Park, London)

KINGSWAY TO THE SEA: WEST HOVE SEAFRONT PUBLIC REALM IMPROVEMENTS PARK GARDEN

Artist's impression, view looking west across new Park Garden space, showing planting including meadow grasses to lawn, perennials to embankments, and trees

GARDENS FOR THE LINEAR PARK

- There are 4no Garden areas proposed along the park's length
- The largest of these is on the old Pitch & Putt space (east)
- These will be accessible spaces with new planting and trees (note, mature tree heights will be limited due to site conditions)
- The planting will relate to the challenging coastal environment
- The Gardens will offer valuable space for shade and shelter, seating, rest and relaxation, dog-walking, and general play
- New planting will also support climate change mitigation and increase biodiversity supporting pollinators

Existing bare amenity lawn of old Pitch & Putt space

Perennials (Shoreham Beach)

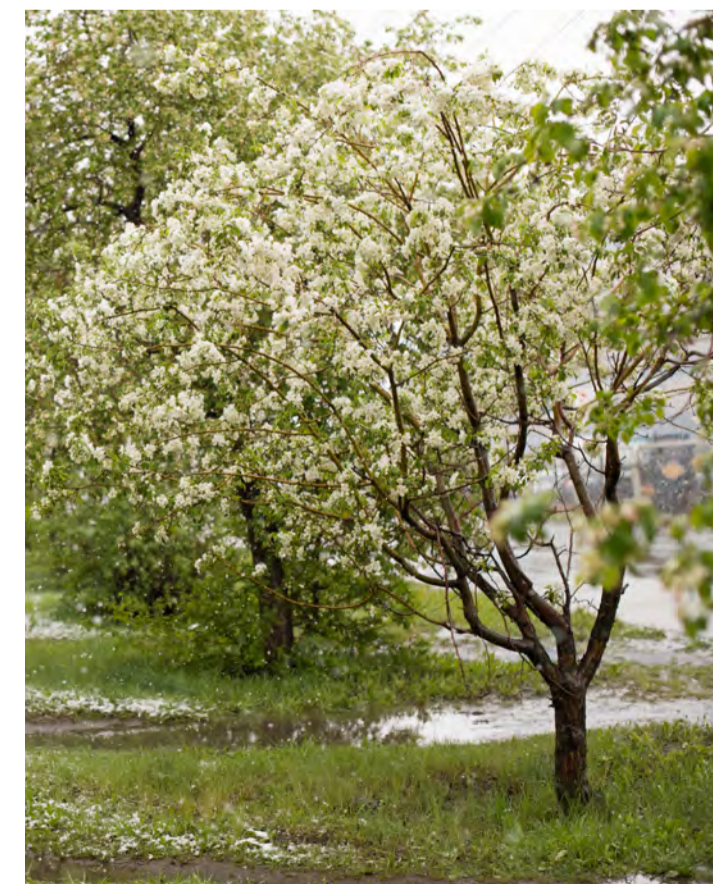

Intermingled garden planting precedent (Charlottetown, Copenhagen)

Sea Buckthorn (berries for birds)

Tamarisk

Hawthorn (flowers for pollinators and berries for birds)

Pine (evergreen)

'Grassy' perennials mix

Coastal pine and hawthorn, demonstrating character of planting shaped by the wind (Dodman Point, Cornwall)
