3.2 The Libraries Plan demonstrates the value of public libraries and shows how they support priority objectives for the city such as health and well-being; reading and literacy; children and adults learning; supporting elderly and vulnerable people; and providing important, safe and trusted community spaces in local neighbourhoods.

3.3 The vision for the Library Service was articulated in 2009 and remains relevant today: ***‘Libraries at the Heart of our Communities: Broadening Horizons, Improving Lives’***. Public libraries are fundamental to a democratic society, and play a powerful role in supporting community and personal development, that underpins economic activity and enriches people’s lives. Libraries make a difference on an individual level: inspiring people; widening their view of the world and what is achievable; supporting learning, and enabling access to knowledge and information. Libraries also bring people together, providing a focus for community activity and interaction, reducing isolation and supporting social cohesion. Public libraries are at the heart of sustainable communities.

3.4 The main aims for Libraries for 2014-15 are:

3.4.1 To develop the role of libraries as community hubs, and to work more closely with other service providers to deliver the community and council priorities and objectives for the city.

3.4.2 To expand partnership arrangements with other agencies and council departments to ensure that libraries are alive with activity and enabling people to achieve many different things through their local library.

3.4.3 To support health and well-being, reaching out to those who are housebound or who are carers; developing libraries’ services for vulnerable people, including those with disabilities and older people.

3.4.4 To improve digital inclusion, supporting people using the Internet, particularly those lacking confidence and skills, and delivering assisted digital services to help people access services (particularly government services) online.

3.4.5 To deliver the four Public Library Universal offers around reading, information, health and digital services.

- 3.4.6** To develop the role of libraries in encouraging reading as a valuable cultural activity that underpins people's ability to learn, develop and work, and continue to support adults and children to improve their literacy levels as a vital life skill.
- 3.4.7** To improve customer satisfaction through improving library stock and information services, making best use of new technologies and digital resources.
- 3.4.8** To modernise and deliver value for money through updating library technology, reviewing and improving the use of resources, and streamlining processes, to ensure that library users receive a high quality service that meets their needs.
- 3.5** Details of service objectives and key actions can be found in section 5 of the Libraries Plan.
